Target Price: PLN 38

Upside Potential: +3%

K2 Holding

A good start to the year, challenging base in Q2

After a strong first quarter, we raise our price target by PLN 3 per share to PLN 38, but we reiterate a Hold rating. The excellent results of Fabrity, which reported over 30% growth in operating revenues and a similarly strong increase in operating profit, improve our perception of the company compared to other representatives of the software house segment listed on the Warsaw Stock Exchange, where the organic growth rate is slowing down and pressure on margins is visible. We approach the second quarter with a bit more caution, taking into account last year's demanding base for Fabrity (Q2 was the most profitable guarter for the company in 2022) and less favorable exchange rates, with the strengthening of the PLN, which naturally affects the profitability of revenues from foreign markets in the short term . We believe that it will be harder to improve the result in Q2, but we hope for a return to higher dynamics in the second half of the year. Fabrity's customers are in many cases less dependent on economic fluctuations. Apart from Frontex, many contracts are projects with a horizon of several years, which should offset the impact of the slowdown in the sector on the company's results. At the same time, it has become easier to recruit employees. Fabrity increased the team by nearly 30 people in the first quarter, compared to 220 at the end of 2022.

Dividend. The proposed PLN 4.0 per-share payment is slightly higher than the PLN 3.2 mentioned by the Management Board at the previous conference as the lower limit of the range resulting from the dividend policy. The amount is close to the net cash the company had at the end of Q1'23 and together with the PLN 8.4 per share paid in the previous year, it probably ends the period of above-average distribution, at least until (if) the marketing business is sold.

PerfectBot will use the potential of GPT models. Currently, the company is rebuilding the product to use the full potential of GPT models, and in the second quarter it plans to increase the number of US customers testing PerfectBot GPT (a dozen or so entities). Commencement of commercialization is planned for 3Q23.

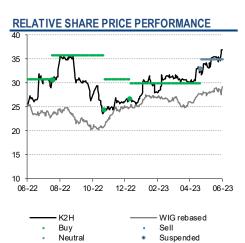

Results forecast. We present restated annual results for the years 2021-22 and in the forecast period with the marketing segment in discontinued operations, which means that practically only the Fabrity business affects revenues and operating results. We assume that it will be more difficult to attract new customers this year due to the weakness of the entire market and, consequently, we expect revenue growth to slow down from +26% y/y in 2023 to +16% in 2024, with a similar operating margin. Dividend payment in Q4 will reduce financial income in subsequent quarters, which will result in a lower than EBIT increase in net profit in 2023. Below EBIT, we assume a positive contribution from the marketing segment of PLN 1.9m in 2023 and PLN 1.8m in 2024, minority interest profits in Fabrity (PLN 1.1 million and PLN 1.3 million, respectively) and a loss of approximately PLN 0.5 million annually attributed to the 50% stake in PerfectBot.

Valuation. Our target price is based on DCF (PLN 36.3) and total-of-the-parts (PLN 39.2) valuations. In the sum-of-the-parts valuation, we rely on the Polish peer group for Fabrity, the valuation from the last financing round less a 10% discount for PerfectBot, and target EV/EBITDA and EV/EBIT ratios for marketing.

Valuation

Valuation Approach. After moving the results of marketing to discontinued operations in our forecasts, we change the weights of individual valuation methods in the calculation of the target price. We no longer take into account the comparative valuation, where 50% weighting were foreign companies from the marketing sector. Our target price is now based on the DCF valuation (PLN 36.3) and the total-of-the-parts valuation (PLN 39.2, including the Polish peer group for Fabrity, the valuation from the last financing round less a 10% discount for PerfectBot and EV/EBITDA and EV/EBIT ratios for marketing). In the sum-of-the-parts method, the Fabrity valuation range is set by comparison to a wider IT group (lower end) and only to two representatives of the software house sector (upper end).

DCF valuation

DCF valuation assumptions:

- 1) Risk-free rate at 6.0% in the detailed forecast period (previously 6.5%), and 5.0% on TV (unchanged);
- 7.5% market premium (according to our methodology for entities below sWIG80);
- 3) Beta unleveraged 1.0x, residual growth rate 3.0% (previously 2.5%, we are increasing after excluding the marketing segment).

Source: Bloomberg, Trigon DM

Risk factors

- Risk related to increased competition in the software house segment
- General economic situation
- Risk of losing customers
- Risk of losing key employees
- The risk of failure of the PerfectBot project
- Risk related to customers' failure to meet payment deadlines
- Currency risk (most of Fabrity revenues is denominated in foreign currencies)

The abovementioned risk factors were covered in detail in the initiation report.

Recommendations of the Brokerage House

BUY - we expect that the rate of return on an investment will be at least 10%

NEUTRAL - we expect the price of an investment to be relatively stable, optionally it will increase no greater than 10%

SELL – we expect that an investment will make a loss greater than 0%

Recommendation prepared by: Dominik Niszcz

Recommendations are valid for a period of 12 months from the date of issuance (the date specified at the beginning of the document) or until the price target of the financial instrument is achieved.

The Brokerage House may update its recommendation at any time, depending on current market conditions or assessment of persons preparing the recommendation. Short-term recommendations (particularly those designated as speculative) may be valid for a shorter period of time. Short-term recommendations designated as speculative involve a higher investment risk.

Valuation methods used

The Brokerage House customarily applies two methods – discounted cash flow (DCF) and multiples methods (a comparison of a company's trading multiples with the metrics of comparable companies). Alternatively, a discounted dividend model may also be used. The key disadvantage of methods based on discounted cash flows is high sensitivity to adopted assumptions, whereas their advantage is a lack of relation to a company's current market price. On the other hand, the main disadvantage of the multiples method is a risk that at a given point in time the market prices of comparable companies might not reflect their true value, whereas its advantage lies in the fact that it shows a company's market value obtained based on the market values of comparable companies.

As basis valuation methodology and the adopted assumptions used to assess the financial instrument or issuer or to determine the target price of the financial instrument was adopted DCF valuation, sum-of-the-parts valuation.

The valuation, valuation methodology or adopted assumptions did not change from the date of preparation and the first dissemination of the Document.

The Document was not presented to the issuer and then changed. The document did not change from the date of its preparation and the first dissemination.

Detailed information on the valuation or methodology and assumptions, as well as information on previous recommendations on the Issuer's financial instruments, published in the last 12 months prior to the date of this recommendation, is available on the website of Brokerage House www.trigon.pl.

In the opinion of the Brokerage House, the Document has been prepared objective, with due care and attention and with the avoidance of potential conflicts of interest. The Brokerage House bears no responsibility for any inaccuracies, incompleteness or inconsistency with the facts in the Document. In particular, the Brokerage House bears no responsibility for any damage suffered as a result of investment decisions made on the basis of information contained in the Document.

The Document does not take into account the individual needs and circumstances of any investor nor is it an indication that any investment is suitable for a given investor. Accordingly, the conclusions drawn based on the Document may prove inappropriate for a given investor.

The Brokerage House bears no responsibility for the way in which the information contained in the Document is used. Historical data presented in the Document relate to the past and past performance is no guarantee of similar results in the future. The information relating to the future may prove wrong, as it expresses opinions of persons representing the entity described or represents independent assessment of the Brokerage House.

The information and opinions contained in the Document are not intended to be the sole basis upon which decisions are made. It is therefore advisable for the recipient(s) to make its/their own judgment and assessment of the information, consider information other than that presented in the Document, verify the presented information themselves, asses the risks related to decision-making based on the Document, and consider consulting an independent analyst, investment advisor or other persons with relevant expertise.

Unless specifically stated, the information contained in the Document should not be treated as authorized or approved by the entity described therein. The conclusions and opinions expressed in the Document are conclusions and opinions of the Brokerage House.

There are no conflicts of interest between the Brokerage House and/or persons taking part in the preparation of the Document or having access to the Document before its publication (employees, service providers and other associated persons) and the Issuer. As at the date of preparation of the Document, the Brokerage House holds the Issuer's shares.

Between The Brokerage House and / or participating in the preparation of this Document or having access to the Document prior to its publication: employees, contractors and other services related parties and the Issuer there is no conflict of interest. At the date of preparation of the Document The Brokerage House does not hold shares of the Issuer. As of the date on which this Document is prepared The Brokerage House performs orders to buy or sell financial instruments in its own name but on behalf of the Issuer for the purposes of performance of tasks connected with market maker services or buying or selling financial instruments on its own account for the purposes of performing the investment underwriting agreement or service underwriting agreement. The Brokerage House act as a market maker. Remuneration for persons participating in drawing up this Document is not directly based on financial results achieved by the Brokerage House in connection with transactions in Issuer financial instruments performed by the Brokerage House. Among those who participated in preparation of this Document, as well as those who did not participate in its preparation, but had or could have had access to the Document, there are not people who hold shares of the Issuer in the amount of at least 5% of the share capital or hold other financial instruments whose value is essentially linked to the value of financial instruments issued by the Issuer. The Brokerage House in the past 12 months has not received from the Issuer dividend. Directors of the Issuer or their relatives are not directors of The Brokerage House. None of the persons involved in the preparation of this Document, does not take a management position or is close to the members of governing bodies of Issuer and none of these persons, as well as their relatives are not part of any agreement with the Issuer, which would be concluded on different terms than other agreements entered into by the Issuer and consumers.

There are no other circumstances as regards potential conflict of interest which could be the subject to disclosure on the ground of the regulation on the recommendation. The Brokerage House may conclude an agreement with the Issuer's majority shareholder to offer a block of the Issuer's shares under the accelerated book-building procedure in a manner that does not require the preparation, approval and publication of a prospectus, where the remuneration of the Brokerage House directly depends on the value of the Issuer's shares sold under the above-mentioned agreement.

Additionally, at any time The Brokerage House can perform a function of mandator or mandatary in relation to more than one party, perform long or short stock, perform transactions on its own account or on the client's account regarding financial instruments issued by the Issuer. In the future The Brokerage House is likely to have investment connections within the framework of fiduciary activity as well as other connections with the parties other than the Issuer or Issuer's shareholders.

The Brokerage House manages its actual and potential conflicts of interest by means of measures provided for in the Regulation on Recommendations and by implementing the Brokerage House's general policy for the management of conflicts of interest. In the Brokerage House's opinion, the Document has been prepared in a manner eliminating the effect of any potential conflicts of interest.

The Brokerage House employees participating in the preparing this Document: i) do not receive remuneration directly related to transactions related to the services of the Brokerage House specified in Sections A and B of Annex I to Directive 2014/65 / EU or any other type of transaction that is carried out by the Brokerage House or any other person legal being part of the same capital group as the Brokerage House, nor with fees for such transactions that are received by the Brokerage House or any other legal entity that is part of the same group as the Brokerage House, ii) do not receive or buy shares of the Issuer before the public offer.

Detailed information about the conflict of interest management policy can be found at www.trigon.pl.

The Brokerage House pays careful attention to numerous risks related to investments in financial instruments. Investing in financial instruments carries a high degree of risk of losing some or all funds invested.

The date presented on the first page of the Document is a date of its preparation and delivery to the recipients. Trigon Dom Maklerski S.A. is the owner of the trademarks, service marks and logo presented in the Document. The Brokerage House owns copyrights to the Document and the content of the Document. Any publication, dissemination, copying, use or provision of the Document (or any part thereof) to any third party in any manner other than its legally sanctioned use, requires the consent of the Brokerage House.

Due to certain legal limitations, the Document may not be directly or indirectly presented, made available or issued in jurisdictions where its dissemination may be subject to local legal limitations. Persons presenting or disseminating the Document are obligated to be familiar with and observe such limitations. It is assumed that each person (organisational entity) who receives, accepts or consents to receive the Document, by doing so:

- accepts every reservation mentioned above;
- confirms that he/she has read the Trigon Dom Maklerski S.A. Terms and Conditions of research and recommendations (available on websites: www.doakcji.trigon.pl, www.trigon.pl, referred to as the "Terms & Conditions") and accepts them;
- gives his/her consent to be provided with a one-time service of research and recommendation provision by the Brokerage House through receiving access to the Document. The provision is covered by the Terms & Conditions together with reservations contained in and related to the Document. Additionally, (1) the service is limited to free of charge provision of the Document and use of the Document by the addressee, (2) the service is valid only for the time of using the Document by the addressee. The Document is not an offer within the meaning of Art. 66 of the Polish Civil Code, nor is the basis for entering into any other agreement or creating any other obligation.
